

# BASE OIL

## (SN 150, SN 350 , SN 500)

The main advantage of Payam Saderat recycled base oil is the color of this lubricant will not change during a long time and it is stable and this color stability has made it too popular in the market, because it shows its high quality. Besides the color stability in the following there exist other reasons that Payam Sadeart suplies high quality recycled base oil and it's in the three grades SN150 SN350 and SN500.

## Advantages

- Its flash point is in a suitable range
- It has high Viscosity
- It has low acidity (Typical 0.015)
- It has less smell
- Color Stability

# Typical Characteris

Specifications	ASTM	SN 150	SN 350	SN 500
Viscosity@ 100 ° c (cSt)	D-445	7-8	8-9	9-10
Viscosity Index (VI) (min)	D-2270	110	105	95
Pour Point (° c) (max)	D-97	0	0	0
Flash Point (° c) (min)	D-92	200	220	230
Density at 15 ° c (kg/m3)	D-	865	870	875
Color (max)	D-1500	3	3	3

## Packaging:

- Flexi Bag
- Drum (208 lit) \*

Drums could be New steel drum or used drum and there is facility for palletizing drums base on customer instruction.

★ We recommend our customer to keep safe the cargo in shipping by palletizing drums.
